DEFINITIONS

The terms issued in this Terms and Conditions document shall have the listed meanings. Definitions can be applied whether the terms are used in singular or plural form.

Cryptocurrency: any form of currency that only exists digitally, that usually has no central issuing or regulating authority but instead uses a decentralized system to record transactions and manage the issuance of new units, and that relies on cryptography to prevent counterfeiting and fraudulent transactions

Prediction ("Trading Signal", "Service"): is a statement about a future event. Our Predictions are based upon our subjective opinion. We use our unique analysis to make a Prediction. A Prediction can be tagged as ("Low", "Medium", "High"). Future events are necessarily uncertain, guaranteed information about the future is in many cases impossible. A Prediction is used to make plans for possible developments. The purpose of this information is solely informative and educational. For more information see **RISK DISCLAIMER** part.

User: is a natural adult person who holds a User Account and who uses our Service.

User Account: is the User's personalized online space which allows them to access the Services available via the Website.

Visitor: is any natural adult person who uses our website without signing in to a User Account.

I. THE SERVICE

B-cube.ai is publishing Predictions ("Trading Signal", "Service") on its website. After the User signed in to their User Account he or she can have access to page "Dashboard" where he can see all past Trading Signals that B-cube.ai has published. After subscribing to one of the Premium plans, the User can also see the live signals when they get published. About these Predictions, we share details such as their Creation date, Update time, Type, Crypto, Unit, Range low, Range high, Leverage low, Leverage high, Targets, Stoploss, Risk, Status, Closing State, Performance. Those Signals which performance have not been written yet are market with green color. By moving the cursor or (on touch screen devices), tapping on these listed columns more information are going to be visible in text format surrounded with a black background. On the page "Swing Trading", our real-time predictions for very short term trading on Cryptocurrencies are published. These Cryptocurrencies are the following: BTC, ETH, XRP, EOS, LTC, USDT. A Swing Trading Prediction can be either a Buy or Sell or No Prediction. Please note that these Predictions are in beta version and still experimental. Use them at your own risk. On the page "Financial indicators" we are publishing technical indicators and real-time candlestick price charts. The User can choose from a variety of Cryptocurrency pairs such as BTC/USDT, EOS/BTC, XRP/BTC, ETH/USDT, LTC/BTC, LTC/USDT, ETH/BTC, XRP/USDT. The User can choose from the timeframes of 1h (one hour), 1d (one day), 1w (one week), 1m (one month). Based on this decision, the candlesticks are shown accordingly. If the User chooses 1h (one hour) timeframe, then one candlestick is going to represent one hour. In the case of choosing other timeframe, the candlesticks are going to change accordingly (Daily, Weekly, Monthly). It is possible to use technical indicators on the price data. These indicators can be the following: Volume, RSI, WILLR, CCI, DX, BBANDS, MACD, STOCH. If you are not familiar with these indicators, please do not use them. Use them only at your own risk. All previously listed Predictions are based upon our subjective opinion. We use our unique analysis to make a Prediction. Future events are necessarily uncertain, guaranteed information about the future is in many cases impossible. A prediction is used to make plans for possible developments. The purpose of this information is solely informative and educational. For more information see **RISK DISCLAIMER** part.
